

Guide to Comments and Responses

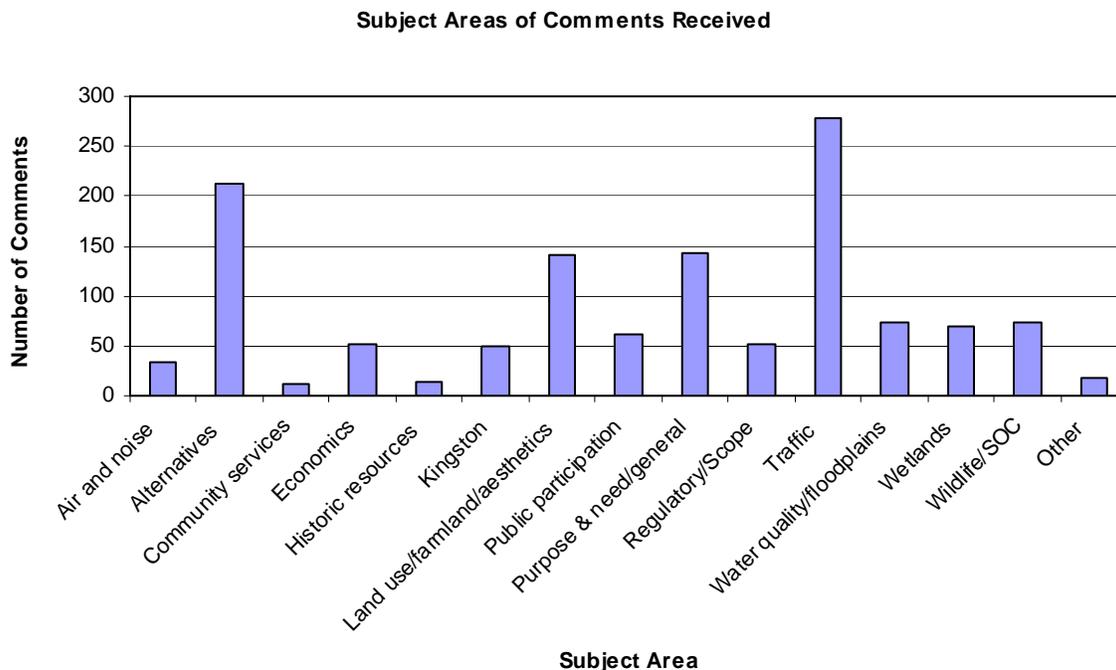

The United States Army Corps of Engineers (USACE) received approximately 1,290 comments on the *Draft Environmental Impact Statement for the Route 92 Project Proposed by the New Jersey Turnpike Authority (DEIS)*, from about 270 commenters.

A review of the individual comments found that the majority fell into 14 areas of concern. The table below shows the number of comments that were submitted for each of 14 areas of concern, plus an “other” category. A graphical depiction of the distribution of comments, by subject area, is presented on the next page.

Subject Areas of Comments Received		
Subject area	Number of comments	Percentage of total
Air and noise	34	2.6%
Alternatives	213	16.6%
Community services	12	0.9%
Economics	51	4.0%
Historic resources	15	1.1%
Kingston	49	3.8%
Land use/farmland/aesthetics	142	11.0%
Public participation	62	4.8%
Purpose & need/general	143	11.1%
Regulatory/Scope	51	4.0%
Traffic	279	21.7%
Water quality/floodplains	73	5.7%
Wetlands	69	5.4%
Wildlife/SOC	74	5.8%
Other	18	1.4%
Total	1,283	100.0%
Form letters of objection (not included above)	1,454	---

USACE received comments in three ways:

- Written comments were received by paper mail and by email from 155 commenters.
- The spoken comments of 75 speakers at the two public hearing sessions on May 20, 2004, were recorded and transcribed.
- During the public hearing, a tape recorder was made available in a separate room for receipt of additional spoken comments. Comments were recorded by 37 commenters, which were then transcribed and made part of this record.

USACE reviewed the comments that were received on the Draft EIS, and provides a response to each comment in two comment-response volumes

Comment-Response Volume 1 presents the comments that were submitted in writing, followed by responses to the written comments. In general, only one copy of each form letter commenting on the proposed project has been included in Volume 1, with a total count provided of the form letters received. The comments are grouped in the first section of the volume, and the responses are grouped in the second section. Volume 1 also contains brief “white papers” on two issues raised in the comments on the DEIS: travel time changes projected to occur if Route 92 is built, and the impact of the proposed widening of the New Jersey Turnpike between interchanges 6 and 8A and the planned construction of a new interchange directly connecting the Pennsylvania Turnpike with Interstate 95 north of Philadelphia.

Volume 2 contains the transcript of the comments of speakers at the public hearing, followed by responses to those comments. The comments are marked and coded in the first section of this volume, and the responses are presented in the second section. Following this group of comments and responses, **Volume 2** also contains the transcript of additional comments spoken into the tape recorder in a separate room during the public hearing. The transcript of the additional tape-recorded comments is followed by responses to those comments.

Within the comment documents, each individual comment has been labeled with a unique code. The comment code consists of a commenter prefix and a sequence number for each comment from that commenter, beginning with 1. The prefix and

the sequence number are separated by a dash. For example, the comments of a commenter with initials ABC might be coded ABC-1, ABC-2, ABC-3, etc., and the comments of a commenter with initials DEF might be coded DEF-1, DEF-2, DEF-3, etc. In a few cases, lower-case letters are used in the codes for a group of consecutive comments from the same commenter that relate to the same general subject area (e.g., traffic, land use, wildlife). For example, a sequence of comments from commenter ABC on the general subject of traffic might be coded ABC-16a, ABC-16b, ABC-16c, etc.

The response to each comment is labeled with the same code as the comment. The comments are grouped in the first section of each volume, and the responses to comments are grouped in the second section of the volume.

To aid in locating groups of comments made by a particular commenter, each group of comments has also been labeled with a unique group code. Each comment group code consists of a two-letter prefix and a number, separated by a dash. The prefixes are WC for “written comments,” PH for “public hearing,” comments, and TR for “tape recording” comments. For example, the 23rd commenter at the public hearing may have made 8 comments coded ABC-1 through ABC-8, which together constitute comment group PH23.

Similar Comments

Many of the comments on the DEIS are the same or nearly the same as the comments provided by other commenters. When a response to a comment on a specific issue is presented, other comments that are nearly the same are answered by referring the reader to the initial response, using a comment code, rather than reprinting the original response. A multi-part comment is sometimes answered by reference to several responses. This approach shortens the response portions of the comment-response volumes. For example, the response to comment DEF-3 may be “Please see the response to comment ABC-2.” A response to comment DEF-3 will be found in the response to comment ABC-2.

Three indexes are provided at the end of this guide to assist the reader in locating comments and groups of comments, or in locating all comments made by a particular commenter. Index 1 lists the commenters by name in alphabetical order, provides the comment code prefix and the comment group code for each commenter, and lists the volume and page where the comments of that commenter begin. Index 2 lists the comment code prefixes in alphabetical order, provides the corresponding comment group codes, and lists the volume and page where the comments with that comment code prefix begin. Index 3 lists the comment group codes in alphabetical and numerical order and lists the volume and page where each group of comments begins.

If the response to comment DEF-3 reads “Please see the response to comment ABC-2,” the reader should refer to Index 2, find comment code prefix ABC, and go to the volume indicated and locate the response to that comment.

Index 1 – By Name of Commenter
